PROFILE SUMMARY

Final-year Computer Science student with hands-on experience building AI-powered applications using Python, machine learning technologies, and data analysis and visualization. I have also worked on full-stack web applications using React, Node.js, Express.js, and MongoDB, as well as REST APIs and SQL-based projects. I have experience with cloud platforms such as AWS, Cisco networking, development tools, and productivity tools such as Microsoft Office, with the ability to support coordination, documentation, and administrative tasks when required.

EDUCATION

Bachelor of Computer Science (Honours), Taylor's University Jan 2023 – Present (Expected: 2026)
Studied at IIMS College, Kathmandu, Nepal

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, TypeScript, SQL, PHP, Dart

Frontend: React.js, Next.js, Redux, HTML5, CSS3, Tailwind CSS, Flutter, Responsive Design

Backend: Node.js, Express.js, REST APIs, JWT Authentication, Middleware

Databases: PostgreSQL, MySQL, MongoDB, Neo4j, MinIO

AI / ML: Python (NumPy, Pandas, Scikit-learn), PyTorch, TensorFlow, NLP, CV, Pydantic, MLflow, Lark, Ollama, LangChain, LangGraph

Tools & DevOps: Git, GitHub, Linux, GitHub Actions, Docker, Alembic, Redis, Postman, AWS, Google Cloud, Azure, Tableau, Microsoft Power BI, Cisco Packet Tracer

CS Concepts: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Productivity Tools: Microsoft Word, Microsoft PowerPoint, Microsoft Excel, Microsoft Outlook, Microsoft Teams

PROFESSIONAL EXPERIENCE

Artificial Intelligence Intern, Alpinist Studios May 2026 – Aug 2026 | Lalitpur, Nepal

- Contributed to an **AI-powered code review platform** for GitHub repositories by building an automated security and code quality analysis pipeline (Bandit, Semgrep, Gitleaks, Ruff, and others) with GitHub OAuth 2.0 authentication and validation. Built an LLM-powered code analysis chatbot with semantic search and Git-based issue tracking. github.com/amanshahdev/ai-code-reviewer
- Developed an **AI banking chatbot** that turns natural-language questions into safe, read-only SQL (Groq LLMs, Lark) and returns verified answers from PostgreSQL. Added Pydantic validation, SQL safety checks, and session-based memory. github.com/amanshahdev/bank-chat-engine
- Built a **news classification system** using TF-IDF and Linear SVM that sorts articles into World, Sports, Business, and Sci/Tech, with an NLTK preprocessing pipeline and batch prediction. github.com/amanshahdev/ag-news-text-classifier

PROJECTS

VisionAID: Document-to-Speech Accessibility Mobile App, Flutter · Dart · Tesseract OCR

GitHub: github.com/amanshahdev/visionaid-v2

- Developed a Flutter mobile app where users capture or upload document image, extract its text with OCR, and listen to it as audio.
- Added local saving of text and audio, a saved-files history screen, and in-app playback controls.

ResumeAI: AI-Powered Resume Analysis Tool, React · Node.js · Express · MongoDB · JWT · Multer · pdf-parse

GitHub: github.com/amanshahdev/resume-ai | Live: resume-ai-app1.vercel.app

- Built a MERN app that scores uploaded PDF resumes and gives feedback on skills, keywords, and formatting.
- Added JWT login, protected routes, a history dashboard, and security with Helmet, CORS, and rate limiting.

Travel Tracker: Trip Journal & Expense Tracker, PHP · MySQL · XAMPP · HTML · Javascript · Tailwind CSS

GitHub: github.com/amanshahdev/travel-tracker

- Built a travel journal where users log trips with notes, photos, and expenses.
- Added add, edit, delete, and search features, plus public/private trip sharing.

FreelanceHub: Online Freelance Marketplace Platform, React · Node.js · Express · MongoDB · JWT · bcrypt

GitHub: github.com/amanshahdev/freelance-frontend | Live: freelancehub-marketplace.vercel.app

- Built a freelance marketplace where clients post jobs and review applicants, and freelancers browse jobs and track applications.
- Implemented secure JWT login with bcrypt, separate client and freelancer roles, and job search with pagination.

Chronicle: Smart Productivity & Task Management Dashboard, React · Node.js · Express · REST APIs

GitHub: github.com/amanshahdev/chronicle | Live: chronicleapp-dashboard.vercel.app

- Built a task management dashboard with calendar and history views and AI-generated schedule suggestions.
- Added protected routes, authentication middleware, and Chart.js charts of work patterns and performance.

CERTIFICATES

MERN Stack Development — *Broadway Infosys · March 2025*

Data Analytics Essentials — *Cisco Networking Academy · March 2025*

Introduction to Natural Language Processing — *Great Learning · June 2024*

Enterprise Design Thinking Practitioner — *IBM · March 2024*

Network Technician Career Path — *Cisco Networking Academy · June 2023*

AWS Cloud Practitioner Essentials — *AWS Training and Certification · March 2023*

AWARDS

Dean's List Letter of Commendation

Earned a place in Dean's List for 4 consecutive semesters.

LANGUAGES

English — Fluent | **Nepali** — Native/Bilingual
